World Cat 290 Dual Console: *fish on, and take a smooth ride!*

World Cat's new 290 dual console features a semi-displacement hull that's engineered for the smoothest ride – no matter what the conditions. The design builds on the Vectorflo Air Cushion System that gives World Cat boats their superior rough-water performance.

The boat can easily convert between a fishing vessel and a family boat by adding or removing cushions to create more fishing space or seating. Molded-in toe rails and retractable aft seating across the transom create an expansive cockpit floor space for fighting fish or for an evening cruise. Boarding the boat – or hauling large fish onto the deck – is easy with World Cat's first Euro transom. She includes increased-capacity fishing boxes with live wells and boxes integrated into the four-person helm seating area. And integrated hard top lighting ensures fishing and entertaining can extend well beyond sunset.

A dual windshield (with wipers) protects two double helm seats on each side, and with the optional custom canvas enclosure, six passengers – four facing forward and two facing aft –

are completely protected. And an improved head and new Euro transom transform this power catamaran into the ultimate offshore family-fun boat.
